Proposal 1 Nass Tech Solutions

Website proposal

Websites are crucial for business to connect with customers, promote products, build credibility and services. They allow companies to share detailed information about their and enhance accessibility for users. This project aims to create a website for Nass Tech Solutions, a technology consulting firm, providing informative, user friendly, attractive and effective in increasing the company's online presence and client base.

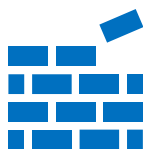

➤ Organization overview.

Established in 2019, Nass Tech Solutions is a consulting company focused on technology. The company provides IT services to small and medium-sized businesses needing help with digital systems and online services. The group was established to assist companies in conquering the difficulties involved with expensive and complex technological choices.

Nass Tech solutions is dedicated to delivering simple, affordable and effective solutions customized to meet the specific needs of every client. The business wants to assist businesses in raising their general performance, efficiency and productivity by means of technology.

Mission.

Nass Tach Solutions aims to provide modern, trustworthy and reasonably priced technological solutions that advance operational effectiveness and foster corporate growth.

Vision.

The company aims to become a trusted technology partner for small and medium-sized businesses by providing high-quality digital solutions and building strong relationships with its customers.

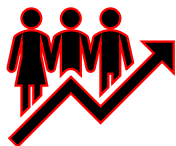

Target Audience

- *Organizations wanting to improve their online presence.*
- *Startups requiring digital solutions.*
- *Small and medium-sized companies or businesses.*
- *Business owners seeking IT support.*

➤ **Website goals and objectives.**

Key performance indicators.

-
- *Conversion rate of visitors to clients.*
 - *number of website visitors per month.*
 - *User engagement with website content.*
 - *Increase in client communication.*
 - *Number of enquiries submitted through forms.*

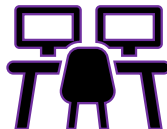

Website goals.

- *Provide detailed information about services.*
- *Build trust and credibility.*
- *Encourage users to contact the company.*
- *Promote the services offered by Nass Tech Solutions.*
- *Increase the online visibility of the business.*

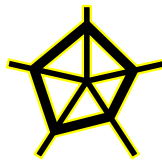

➤ Current website analysis.

Opportunities.

- *Improve user engagement.*
- *Increase customer enquiries.*
- *Build a stronger online presence.*
- *Provide detailed service descriptions.*
- *Expand into a multi-page website.*

Weaknesses

- *No enquiries or contact forms.*
- *Not fully responsive to mobile devices.*
- *Lack of detailed service information.*
- *Limited content on single page.*
- *Poor online visibility.*

➤ ***Proposed website features and functionality.***

Homepage (index.html).

The homepage will serve as the main entry point of the website and will provide a strong first impression to visitors.

- ***Hero Section with call to Action***
 - *A large visually appealing banner with a background image and overlay text introducing Nass tech Solutions. It will include CTA buttons such as “Explore services and sign in” to guide user toward key actions.*
- ***Business introduction***
 - *A short summary explaining what the company does, its services and it’s the full services page.*
- ***Services overview section***
 - *A preview of key services with icons and short descriptions, linking to the full services page.*

-
- **Navigation Bar**
 - A fixed header with links to all pages (Home, About, services, contact, careers, client portal and Blog) for easy navigation.
 - **Footer Section**
 - Copyright information.

About Us page (about_Us.html)

This page will build trust and credibility by providing detailed company information.

- **Company Background**
 - A detailed history of Nass Tech Solution, including when it was established and its purpose.
- **Mission and Vision statements**
 - Clearly defined goals and long-term aspirations of the company.
- **Core Values**
 - A breakdown of company principles such as innovation, reliability and customer.

Services page (services.html).

This page will provide a detailed breakdown of all services offered.

- **Each service will include**
 - A clear description
 - Key benefits to client
 - Optional pricing or request quote button

- **Services include**

- *Cybersecurity services.*
- *Data Analytic services.*
- *Website Design & Development*
- *System Maintenance*
- *Hardware installation.*
- *Wi-Fi & Network setup*
- *IT support & Repairs*

- **Additionally**

- *Call action buttons request a quote or enquire Now.*
- *Service cards layout, easy to read sections with icons.*

Enquiries page (enquiry.html).

This page will allow users to send direct enquiries.

- **Enquiry form**

- *Full Name*
- *Email address*
- *Subject*
- *Message Box*

contact page (contact.html).

This page will provide multiple ways for customers to reach the business.

-
- **Contact information**
 - Phone number.
 - Email address.
 - Physical business location.
 - **Google maps integration**
 - Embedded map showing the exact business location.
 - **Quick contact form**
 - A simplified version of the enquiry form for convenience.

Careers page (careers.html)

This page will allow job seekers to explore opportunities

- **Job listings**
 - Available positions with descriptions and requirements
- **Company culture section**
 - Information about the work environment and benefits

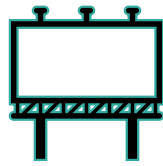

Client portal page (client_portal.html)

A secure area for registered clients

- **User Registration and login System**
 - Allow clients to create accounts and log in securely
- **Dashboard.**
 - Project updates
 - Communication history

-
- *Service requests*
 - **Secure Messaging System.**
 - *Clients can send and receive messages directly from the company*

Blog page (blog.html).

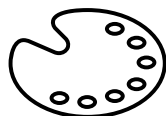

This page will help improve SEO and user engagement.

- **Blog posts section**
 - *Technology tips.*
 - *Industry news.*
 - *IT best practice.*
- **Search and filter functionality**
 - *Users can find articles easily.*
- **Comment section**
 - *Allows interaction and engagement.*

➤ **Design and user experience.**

Colour scheme

- *White is clean and has a modern design.*
- *Green is technology and innovation.*
- *Blue is trust and professionalism.*

-
- *Gray keeps attention on important elements.*
 - *Bright blue stays contrasts strongly with blue very eye catching.*

Typography

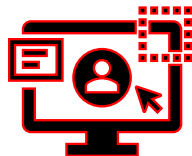

- *Body text – Arial*
- *Headings – Poppins*

Layout.

- *Footer with contact information.*
- *Hero section with background image.*
- *Main content sections.*
- *Header with logo navigation.*

➤ User Experience considerations.

- *Clear call to action buttons.*
- *Easy navigation menu.*
- *Simple and readable content.*
- *Fast loading page.*
- *Mobile friendly design.*

➤ **Technical Requirements.**

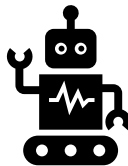

- *Html for structure.*
- *CSS for styling.*
- *JavaScript for interactivity.*

Hosting

- *GoDaddy.*
- *HostAfrica.*
- *Afrihost.*

➤ **Testing and quality Assurance**

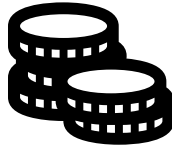

Testing and quality assurance are vital while creating a website to guarantee it runs smoothly and offers a positive user experience. Before submission, the Nass Tech method will go through much testing.

Navigation testing will look at every link between web pages to make sure they work the way they should, such as being able to go back to the homepage and making sure there are no links that don't work. To guarantee the website shows appropriately on many browser compatibility testing will encompass Google chrome, Microsoft Edge, and Mozilla Firefox.

Media testing will confirm images load properly and are well-prepared, while content testing will check grammar, spelling and style. The volunteer's

application form will be checked for correct data entry and functionality. Finally, HTML code will be checked to make sure it satisfies industry requirements.

➤ **Budget Estimate.**

Professional cost Breakdown

Phase	Description	Hours	Rate	Cost
<i>UI/UX design</i>	<i>Wireframes, layout design and revisions.</i>	<i>12 hours</i>	<i>R150/hr</i>	<i>R 1800</i>
